**UNDERGRADUATE PROGRAMME OF
SCIENCE & TECHNOLOGY**

Major in **Computer Science** and Minor in **Multidisciplinary**
(Subject)

Under the Faculty of Science & Technology
(Revised as per the Govt. Of Maharashtra circular Dt. 13th March 2024)

From the Desk of the Dean, Faculty of Science and Technology

Swami Ramanand Teerth Marathwada University, Nanded, enduring to its vision statement “***Enlightened Student: A Source of Immense Power***”, is trying hard consistently to enrich the quality of science education in its jurisdiction by implementing several quality initiatives. Revision and updating curriculum to meet the standard of the courses at national and international level, implementing innovative methods of teaching-learning, improvisation in the examination and evaluation processes are some of the important measures that enabled the University to achieve ***the 3Es, the equity, the efficiency and the excellence*** in higher education of this region. To overcome the difficulty of comparing the performances of the graduating students and also to provide mobility to them to join other institutions the University has adopted the cumulative grade point average (CGPA) system in the year 2014-2015. Further, following the suggestions by the UGC and looking at the better employ ability, entrepreneurship possibilities and to enhance the latent skills of the stakeholders the University has adopted the Choice Based Credit System (CBCS) in the year 2018-2019 at graduate and post-graduate level. This provided flexibility to the students to choose courses of their own interests. To encourage the students to opt the world-class courses offered on the online platforms like, NPTEL, SWAYM, and other MOOCS platforms the University has implemented the credit transfer policy approved by its Academic Council and also has made a provision of reimbursing registration fees of the successful students completing such courses.

SRTM University has been producing a good number of high calibre graduates; however, it is necessary to ensure that our aspiring students are able to pursue the right education. Like the engineering students, the youngsters pursuing science education need to be equipped and trained as per the requirements of the R&D institutes and industries. This would become possible only when the students undergo studies with an updated and evolving curriculum to match global scenario.

Higher education is a dynamic process and in the present era the stakeholders need to be educated and trained in view of the self-employment and self-sustaining skills like start-ups. Revision of the curriculum alone is not the measure for bringing reforms in the higher education, but invite several other initiatives. Establishing industry-institute linkages and initiating internship, on job training for the graduates in reputed industries are some of the important steps that the University would like to take in the coming time. As a result, revision of the curriculum was the need of the hour and such an opportunity was provided by the New Education Policy 2020. National Education Policy 2020 (NEP 2020) aims at equipping students with knowledge, skills, values, leadership qualities and initiates them for lifelong learning. As a result the

students will acquire expertise in specialized areas of interest, kindle their intellectual curiosity and scientific temper, and create imaginative individuals.

The curriculum given in this document has been developed following the guidelines of NEP-2020 and is crucial as well as challenging due to the reason that it is a transition from general science based to the discipline-specific-based curriculum. All the recommendations of the *Sukanu Samiti* given in the **NEP Curriculum Framework-2023** have been followed, keeping the disciplinary approach with rigor and depth, appropriate to the comprehension level of learners. All the Board of Studies (BoS) under the Faculty of Science and Technology of this university have put in their tremendous efforts in making this curriculum of international standard. They have taken care of maintaining logical sequencing of the subject matter with proper placement of concepts with their linkages for better understanding of the students. We take this opportunity to congratulate the Chairman(s) and all the members of various Boards of Studies for their immense contributions in preparing the revised curriculum for the benefits of the stakeholders in line with the guidelines of the **Government of Maharashtra regarding NEP-2020**. We also acknowledge the suggestions and contributions of the academic and industry experts of various disciplines.

We are sure that the adoption of the revised curriculum will be advantageous for the students to enhance their skills and employ ability. Introduction of the mandatory *On Job Training, Internship program* for science background students is praise worthy and certainly help the students to imbibe firsthand work experience, team work management. These initiatives will also help the students to inculcate the workmanship spirit and explore the possibilities of setting up of their own enterprises.

- 9. Field Work / Projects/ OJT/ Internship/Apprenticeship related to DSC major subjects (14 credits for Honours and 22 credits for Honours with Research credits):** The students shall have to complete Field Work, Project, Case Study, Internship or Apprenticeship, etc. as per the credit framework.
- 10. Bachelor of Science in Computer Science (Optional)Honors and Minor in DSM.**

For the award of **Bachelor of Science in Computer Science(Optional) Honors and Minor in DSM** students have to complete **92 credits** from Major, **20 credits** of Minor and the required number of credits of Field Work / Projects/ Internship/Apprenticeship/Case study **related to Major subject**.

11. Bachelor of Science in Computer Science (Optional) Honors with Research and Minor in DSM.

For the award of **Bachelor of Science in Computer Science(Optional) Honors with Research and Minor in DSM** students have to complete **84 credits** theory courses of Major subject, **20 credits** of Minor and required number of credits of Field Work / Projects/ Internship/Apprenticeship/Case study **related to Major subject**.

12. These guidelines are as per the present instructions from Government of Maharashtra and are subject to change time-to-time as per the guidelines from Govt. of Maharashtra.

MULTIPLE EXIT Options for Students:

1. Exit Option after First year

Students may take exit after completion of first year with **Certificate in Major (DSC) and Minor (DSM) subject** on completion of minimum 44 credits and additional 4 credits of NSQF skill / vocational in major/minor subject or internship during summer vacation.

2. Exit Option after Two years

Students may take exit after completion of second year of the programme with **Diploma in Major (DSC) and Minor (DSM) subject** on completion of minimum 88 credits and additional 04 credits on NSQF skill / vocational or Internship on major/minor courses during summer vacation.

3. Exit Option after Three years

Students may take exit with a Degree as **Bachelors of Science in Major (DSC) and Minor (DSM)** after earning minimum of 132 credits.

4. Exit Option after Four Years after completing 176 credits

(a) Bachelor of Science in Computer Science(Optional) Honours and Minor in DSM.

(b) Bachelor of Science in Computer Science(Optional) with Research and Minor in DSM.

C. CSCSCCT1101 (Theory): Fundamentals of Computer Science

Periods: 30 Hours

Max. Marks: 50 [ESE:40 & CA:10]

Credits : 2

Course Pre- requisite: HSC (XIIth Science) pass

Course Objectives:

- To understand the basics of computer system, its architecture.
- To understand functioning of computer components.
- To know the key terms related to the computer system
- To design Algorithm and flowcharts.
- Develop skills in analyzing the usability of a web site.
- Understand how to plan and conduct user research related to web usability.
- Learn techniques of responsive web design, including media.

Course Outcome: After completion of this course students will be -

- Identify the components of a personal computer system.
- Demonstrate input/output unit functions
- Design Algorithms and Flowcharts.
- Be able to use the HTML tags.
- Understand the principles of creating an effective web page.

Course Pre- requisite: HSC (XIIth) pass from any faculty

Course Objectives:

- Understand the software testing life cycle
- Understand various components of computers
- Work confidently with GUI base operating system
- Create various business documents using Word Processor
- Create electronic Spreadsheets
- Work with charts and graphs
- Understand internet and its functionalities.
- Sending and receiving emails
- Create presentations
- Working with animations in presentations

Course Outcome: After completion of this course

- Knowing Computer
- Computer using GUI based Operating System
- Understanding Word Processing
- Using Spreadsheet
- Communication using the Internet
- WWW and Web Browsers

Programming in C-Language

Periods: 30 Hours

Max. Marks: 50 [ESE: 40 & CA:10]

Credits : 2

Course Pre- requisite: HSC (XIIth) science pass

Course Objectives:

- The data structures paper helps the students to have the practical understanding of the subject..
- Able to write well-structured procedure-oriented programs.
- To solve problems using data structures such as linear lists, stacks, queues, hash tables, binary trees, heaps, binary search trees, and graphs and writing programs for these solutions.
- The course aims to provide exposure to problem-solving through programming
- It aims to train the student to the basic concepts of the C-Programming language.
- It is general purpose and procedure oriented programming language. In which we are able to develop OS and MAC operating system application software and programming languages.

Course Outcome: After completion of this course students will be –

- Students are able to use various data structures operations.
- Course is designed to provide complete knowledge of C-Language to develop logics which will enable them to create programs, application in C.
- To develop programs using operators and control statement.
- Introduces the more advanced features of the C language.

Periods :30 Hours

Max. Marks: 50 [ESE:40 & CA:10]

Credits: 2

Course Pre- requisite: ICT (SCSCOE1151)

Course Objectives:

To develop an ability

- Basic ICT tools which help them in their day to day and life as well as in office and research

Course Outcomes:

On completion of this course, the students will be able to

- Understand the literature of social networks and their properties.
- Explain which network is suitable for whom.
- Develop skills to use various social networking sites like twitter, flickr, etc.
- Learn few GOI digital initiatives in higher education.
- Apply skills to use online forums, docs, spreadsheets, etc for communication, collaboration and research.
- Get acquainted with internet threats and security mechanisms.

Guidelines for the Course Assessment:

A. Continuous Assessment (CA) (20% of the Maximum Marks) of theory and practical courses:

- i. **For Theory Course:** CA shall form 20% of the Maximum Marks and shall be carried out over the entire semester. It shall be done by conducting **Two Tests** (Test I on 40% curriculum) and **Test II** (on remaining 40% syllabus) and average of the marks scored by a student in these two tests of a particular paper shall be taken as the **CA** score.
- ii. **For Practical Course:** CA score of the practical course shall be marks scored by a student in the internal practical examination conducted by the concerned teacher.

B. End Semester Assessment (80% of the Maximum Marks) of theory and practical courses:

(For illustration a paper of 02 credits, 50 marks has been considered and shall be modified appropriately depending upon credits of the individual paper)

Question Paper Pattern of the ESA:

- i. **ESA Question paper shall consist 6 questions, each of 10 marks**
- ii. **Question No.1 shall be compulsory and shall be based on the entire syllabus**
- iii. **Students shall have to solve ANY THREE** of the remaining Five Questions (i.e. from question 2 to 6)
- iv. **Students shall have to solve a TOTAL of 4 Questions.**

C. Assessment of On Job Training (OJT) Course (for 04 credits):

- a. Continuous assessment part (**40%, 40 marks out of 100**) of this course shall be done by the mentor of the student, where he /she is supposed to complete his On Job Training. This shall be based on the regularity, participation and performance of the students at the place of OJT.
- b. Semester End Assessment (ESA) (**60% of the total marks, 60 marks out of 100**) of this course shall be done by a panel of examiners in two parts
 - i. based on the work report submitted by the student (**50% i.e. 30 marks**) and
 - ii. **Remaining 50%** (30 marks) shall be based on his presentation and viva-voce on the work carried to be assessed by the panel of examiners. This assessment shall be done along with practical examinations of respective courses / subjects.

D. Assessment of Field Project (FP) and Research Project (RP) (e.g. for 02 credits)

- a. Continuous assessment part (**40%, 20 marks out of 50**) of this course shall be done by the mentor of the student and shall be based on regularity, experimental work and performance of the student.
- b. Semester End Assessment (ESA) (**60% of the total marks, 30 marks out of 50**) of this course shall be done shall be done by a panel of examiners in two parts
 - i. based on the work report submitted by the student (**50% i.e. 30 marks**) and
 - ii. **Remaining 50%** (30 marks) shall be based on his presentation and viva-voce on the work carried out by the student. This assessment shall be done along with practical examinations of the respective courses / subjects.

E. Assessment of Co-Curricular courses (CCC):

- a. Assessment of the CCC course shall be done by the respective course coordinator as a part of CA and be based on the regularity, performance of a student and his participation in various activities as prescribed in the regulations prepared in this regard.
- b. The End Semester Assessment (ESA) of the CCC courses shall be done as per the regulations prepared in this regard and shall be done on the basis of the write-up, presentation by the student on the activities that he has carried out in a semester.
- c. Students shall have freedom to opt for more than one CCC courses. However, score of the best performing CC shall be considered for preparing his result.

F. Syllabi, Teaching and Examination Scheme for the courses in Column 7 and Column 8 (AEC, VEC, IKS, CI, EVS, CCCs, etc.) shall be common for all the students from different faculties.

Note: Number of lectures required to cover syllabus of a course depends on the number of credits assigned to a particular course. One credit of theory corresponds to 15 Hours lecturing and for practical course one credit corresponds to 30 Hours. For example, for a course of two credits 30 lectures of one hour duration are assigned, while that for a three credit course 45 lectures.
